Target groups

- Farmers, especially medium and small farm holders
- VET providers, Teachers and Trainers
- Advisors, Researchers and Farmer Organisations, HEIs, adult education institutions, local authorities, policy makers, NGOs

Project background

Farm4SD aims at developing a holistic, innovative and inclusive approach to farmers' and especially to medium and small farm holders' training on the pillars of the sustainable agriculture –The Agenda 2030 for Sustainable Development, EU Green Deal, From Farm to Fork and Biodiversity Strategies and the new CAP – combined with entrepreneurial and soft skills, so as farmers and C-VET educators to upskill and reskill, in order to become true factors of change and contribute to environmental protection, to the sustainable growth of our planet and to rural development.

For these target groups the project aspires to:

- Develop a culture of sustainability and innovation among EU farmers and empower them by providing a set of cutting-edge training resources building on skills intelligence, available in digital and open media
- Foster the capacity building of C-VET educators in sustainable agriculture, advanced training methodologies and skills recognition approaches, to be able to meet the needs of the agricultural labour market.
- Support the development of micro-learning, digital based VET resources well aligned to evolving working methods and key competences in the subject area
- Enable the green and digital transformation of agricultural sector and C-VET provision by offering policy recommendations
- Support inclusion and accessibility in VET by reaching farmers in rural areas and C-VET educators faced with geographical and socio-economic barriers
- Utilize the EQF, the updated ECVET, ECTS and micro-credential approach to facilitate transparency and recognition of competences, learning, advocacy, and employability in the sustainable agricultural sector
- Increase the capacity of participating organisations to collaborate at transnational level and adopt new methods and best practices in their everyday operations that can be transferred all over Europe and beyond
